CLASSIFICATION: UNCLASSIFIED

Hi Jonathon: The Corps has further reviewed the #14421 Palmetto Trails Network Plan [Manatee County] ETDM determination by the Corps and we have determined we can change our determination from "moderate" to "minimal" based on the project footprint being within geographical service areas of federally approved mitigation banks and the FDOT commitment to avoid and minimize impacts to waters of the U.S. to the most practicable extent. We again would like to emphasize that depending on the final determination for impacts this project may need to be reviewed as a standard permit. Additionally, if the ROW must be expanded, a functional assessment and mitigation for secondary impacts will be required.

Thank you,
Cynthia Ovdenk, Permits Section
